FORZA®

SOLUTIONS
WITH
INNOVATION

Design • Engineering • Manufacture

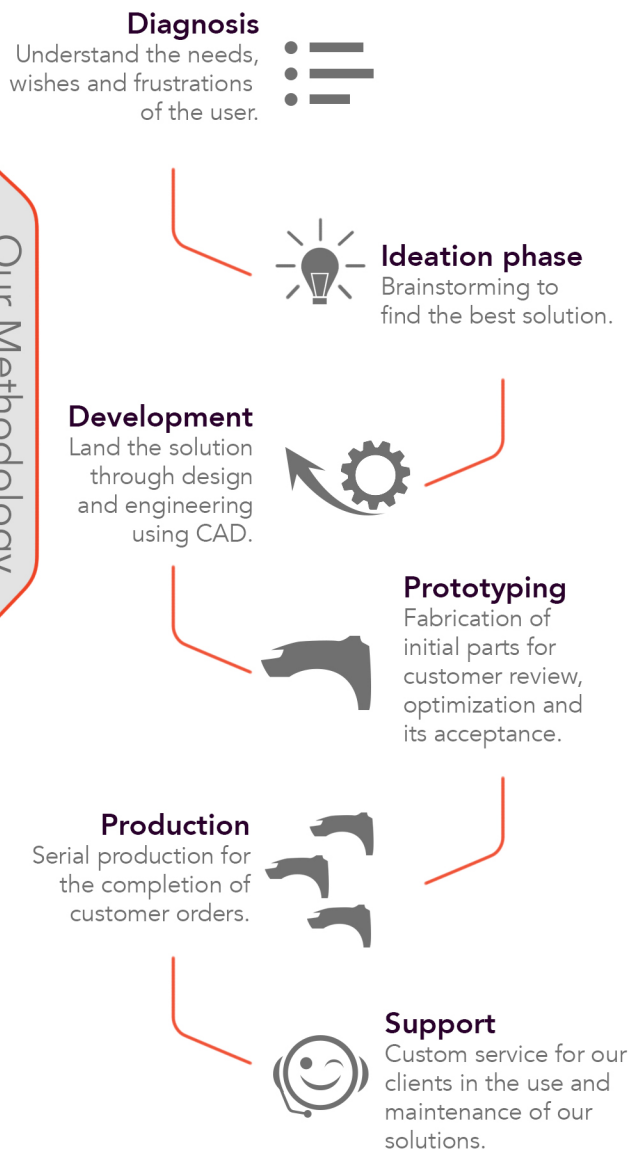

We are a Mexican enterprise focused on innovative solutions for protecting Class A painted surfaces, product packaging, and masking products for your painting process.

With the support of our sales office in Southfield, MI we design, develop and manufacture these solutions, in house, at our Morelos, Mexico location (check address).

Innovative product development, focused on specific customer needs along with outstanding customer service has listed Forza Global Solutions as the "go to" company with OEM vehicle and appliance manufactures.

In **Forza®**, our clients are the primordial part of our development, they keep us in motion.

Our Methodology

Integrated processes:

Thermoforming · Milling ·
Plastic injection · Vulcanization ·
Plastisol · Plastic Lamination

Products

A "second skin" for Class A painted surfaces that protects the product surface from damage during the product's final assembly process

Devices

Customized paint masking devices designed to protect specific product areas during the painting process. These devices can be re usable or designed to be disposable after initial application.

Protection Systems
